

American International Group (AIG)

Summer 2016

| Please give a brief description of your duties. | What value do you feel you added to the organization during your internship? | Did this internship meet your expectations? Why or why not? |
|--|--|--|
| I was assigned to Cash Flow Testing Group this summer and I was responsible to change the format of former documentations and some runs using an actuarial software called Prophet. | I think I added the optimism into this organization through my internship. | Some met my expectations where I got to touch on more actuarial background and life insurance. Some were out of my expectations where I did a lot of work on Word. |
| Would you recommend this internship to another student? Why or why not? | If you could change one thing about your internship experience, what would it be and why? | Please provide any additional information regarding your internship that you feel students should know. |
| Yes, this internship helped me increase my computer skills regarding Word and Excel. Moreover, I got the chance to practice the basics of using one of the actuarial software that our team use on a daily basis to do real work that I will be doing in the future as an actuary. | I would read more knowledge related books before the start of the internship so that I would be more familiar with the terms I was hearing from my colleagues every day. | Take this internship as a 10-week long interview. |
