

Accenture

Fall 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I helped a new client with their application rationalization team. We helped them manage and schedule the decommissioning of their applications. I used big data to analyze these life cycles and determined the correct steps to take.</p>	<p>I was able to locate holes in the data that hadn't been discovered before. Because of this we were able to bring down the unscheduled workloads by 90%. I even had to teach a coworker what I had been doing so they could continue it once I left.</p>	<p>Yes and no. The quality of the internship was great in that the recruiters made sure we were constantly learning and having a good experience. However, the work I was doing didn't deal with people as much as I expected it to.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes. I learned a ton. I was constantly being forced to learn different things and truly got a taste of what the consulting lifestyle is like.</p>	<p>My commute. I had to travel to Jersey on Monday and stay until Thursday. I didn't know this would be the case.</p>	<p>You will grow a lot through the new information being presented to you. However, the work might not be that enjoyable.</p>
