

Amazon

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I worked on implementing a research paper as part of an open source project, trained deep neural networks and conducted research.</p>	<p>I was the only undergraduate working on the team. I was working on the project with a lot of other people, but I did add a different way of thinking. I was the primary driver of my project, and ran experiments that I thought would be beneficial, after discussing with others.</p>	<p>The internship was more than I had expected. I learnt a great deal from it. Overall, it was a great learning curve for me.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>I would definitely recommend this internship. It is great for people aspiring to get experience in machine learning and deep learning.</p>	<p>I wish I could have spent more time with my manager and mentor. They were kept very busy as there were many interns on the team.</p>	<p>I really enjoyed working at Amazon, and learned a lot from it. It was one of the best learning experiences for me!</p>
