

Hello astronomy majors - Please read this entire e-mail carefully!

Advising for Spring 2023 will be held October 3 - 7 to help you prepare for registration (which will be open October 31 – November 11). Advising for the spring will be done in a similar fashion to how it has been done for the past several semesters. For those who have been meeting with a Faculty Advisor (Dr. Chisholm, Dr. Casey, Dr. Hawkins, or Dr. Kraus) in previous semesters, please try to meet with the same person again. If you're new to advising, you should try to meet with the advisor that corresponds with the first letter of your last name (A-G with Dr. Hawkins, H-N with Dr. Chisholm, and O-Z with Dr. Casey), but if you cannot attend any of their sessions you may meet with another advisor.

Notes: If you are an Astronomy honors student, please contact Dr. Kraus directly to schedule an advising appointment.

After you fill out your advising worksheet and meet with an advisor in the Math/Physics/Astronomy (MPA) advising office, you will then need to meet virtually with an Astronomy faculty advisor before you register – this step **MUST** be completed in order for your advising bar to be lifted. Below you will find the scheduled drop-in advising hours for each of our faculty advisors. You do not need to schedule anything ahead of time; you can attend any of their sessions and will be advised on a first-come, first-served basis. The Zoom link in the table below is the same for all of the professor's scheduled drop-in advising hours.

The faculty advisors will be using breakout rooms within their Zoom meetings for individual advising conversations. When you enter a Zoom meeting during drop-in advising, please be patient if the professor is with another student in a breakout room. They will be with you as soon as they are able.

	Dr. Keith Hawkins (A-G)	Dr. John Chisholm (H-N)	Dr. Caitlin Casey (O-Z)
