

Asuna LLC

Fall 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I worked on tasks ranging from devops (kubernetes cluster management) to backend and frontend web development. I was in charge of the architecture for the data ingestion pipeline for character statistics.</p>	<p>I contributed a lot to new services which will be part of the organization for a long time. I also set up many forms of communication that will likely continue to be used for a long time, e.g. GitHub, Jenkins, Kubernetes notifications on Discord.</p>	<p>Yes, as it allowed me to have a lot of ownership over my work.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes and no. Yes if you are willing to put in a lot of time learning via trial and error with not too much guidance. No if you want something more laid back and "fun" -- people at Asuna are serious about what they do.</p>	<p>I would have planned things out more beforehand.</p>	<p>E-sports is a growing and interesting space.</p>
