

Bank of America

Fall 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I worked on testing and improving coverage ratio for modules my team was working on.	By working in testing, I felt it has given me the platform to become a good developer as I become better at writing quality code that improves efficiency and performance.	Yes, I got to work with industry products and I felt I added value to it by improving quality of code which went into production.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes, as it is a good start to working in the industry and applying yourself to become a good developer.	I would have liked to work more in the variety of products the teams I worked with were developing, as I could have gained more knowledge in the industry.	Be enthusiastic to learn about the products in development and network as much as you can with the time you have.
