

Car2Go

Spring 2018

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>As a Data Intelligence intern at car2go, I automated processes using VBA and Excel, created data visualization reports using Tableau, and cleaned datasets using Python.</p>	<p>Since so many tasks at car2go were done manually, I had the opportunity to automate them with my programming skills. In the end, I was able to make many processes more efficient within various departments.</p>	<p>Yes. Going in, I expected to learn at least one important skill related to my career path. I ended up learning Tableau, a data visualization tool that many data scientists use daily.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes. Everyone at car2go is welcoming and willing to help out. It's a fast-paced, fun atmosphere for interns.</p>	<p>Since it was a hassle to receive access to all of the computer programs (due to restrictions by the administrator), it would've been nice if program access was set up before the internship started.</p>	<p>If you want to learn something specific, don't be afraid to ask your supervisor. He or she is always willing to help!</p>
