

## Booz Allen Hamilton

### Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I participated in the Summer Games, competing with a team of 5 other interns to complete a challenge given to us by the company.	Our project advanced relationships with clients and will be published shortly after our internship.	Yes and no. It was somewhat disorganized but I learned a lot and it was definitely interesting.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Maybe. Not for computer science majors but any other major might have a good experience.	I would put me in a project that more closely fits my area of expertise	Networking is key
