

CognitiveScale

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I was working as a Machine Learning Intern, and was responsible for building a Machine Learning model.	I was the only undergraduate working there. So I definitely added a new way of thinking. I was working on the project by myself, so I built a model that was suited for the use-case, and took feedback from my manager every now and then.	The internship was more than I had expected. I learnt a great deal from it. My manager was great and encouraged me to think of more techniques to solve the same problem, and about other similar applications.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
I would definitely recommend this internship to other students. It is great from a Machine Learning perspective, and it will be an enriching experience for sure.	I wish I could have spent more time with my manager. Being a startup he was busy most of the time, but I gained a lot from him.	CognitiveScale is a startup, and they provide Machine Learning solutions to their clients. The work environment is great and motivating. I encourage you to apply!
