

Dun & Bradstreet

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
Mainly working as a back-end developer of a web application.	Inherently curious.	Yes. I learned a lot of great stuff that I could never have chance to know in school.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes.	I should have worked harder after I get back home.	We should be more responsible to the codes we wrote than in the school.
