

Fujitsu Network Communications

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
My duty was to create a sandbox-like application, to testify the result of integrating other teams' components under the same department as a whole.	I was able to create something that allowed other teams to play with the sandbox with their components.	Yes! Because I finally got touched with industry code.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes, if that was their first internship	Quickly get in touch with other co-workers as soon as possible, to understand the starting point of the project.	Find a way to sit in the open area of the company, rather than stay in the cubical area.
