

Google

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
Responsible for building a data processing pipeline that retrieves monitoring data and sends it to an analysis system for comparing new rollouts to the binary in production (canary regression).	I was able to significantly impact the rollout system at Google, with my code saving tens of thousands of processing hours.	Yes. The entire experience was amazing.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yup. The food, people, and work ethic is incredible here	Plan better	Apply early if you want to get in!
