

HPE Vertica

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
As product manager, my responsibilities include to get familiar with our products, to do predictive modeling, to write requirements for software engineers.	I feel I helped them to build a predictive model, and give plenty of suggestions to the team I am working close to.	Yes. This internship exceeds my expectation. Since the work i am doing are very related to the knowledge I learned in school. And also, I learned a lot about how a tech company is running and plenty knowledge of database system.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes. Coworkers are super friendly and you will learn a lot.	Work harder. I feel I can get a lot more from my internship if I worked harder.	It is a great company and Boston is awesome.
