

IBM

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I interned for IBM and helped improve specific tools that are part of a larger service within IBM. I was placed in a team of 4 and we had daily status meetings along with weekly "planning" meetings to target goals for the week.</p>	<p>I feel my work had importance and use to IBM. We worked on improving an opensource service and could read the improvement requests made by users on a forum. So I am happy with the feeling that we are adding content that many will use.</p>	<p>I believe it did. I have learnt A LOT about how to not only behave in a work environment but also the duties and responsibilities that come from that. I was able to meet multiple professionals of all sorts of positions which gave me a wealth of knowledge. I have also expanded up my coding knowledge and improved my coding skills.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>I would recommend this internship because IBM not only supplies fun events for interns, but the work also matters as you know it will be used by many.</p>	<p>I would improve my focus throughout the internship as there were times I feel I did not produce as much as I could.</p>	<p>It is always important to value those around you and the knowledge they are able to share. Do not write someone off just because of a bad first impression.</p>
