

Microsoft

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I interned at Microsoft for the Sway team. Here I was required to write an algorithm to do image analysis on two images and, based on that, crop and scale the images such that the relevant features of each image are aligned and can be compared one on top of the other using a sliding window.</p>	<p>I feel like I added a lot of value to my team. I wrote a lot of the code infrastructure that I had to use in order to get my project done and that will need to be used in the future. I got to write production code that is going to be used by thousands or even millions of users.</p>	<p>I feel that the internship has been better than what I was expecting. Before arriving to Seattle, I didn't know what to expect. I didn't know how was going to be working for the team I was going to work for and I didn't even know what I was going to be working on. Most of my expectations were based on the internship I had last summer. But I think that my internship here at Microsoft definitely went beyond that. It was awesome working for my team and I really enjoyed working on the project that I was assigned to do. Also, I think the recruiters who put the internship together do a great job at it. They really make sure that you get the best out of it. They organize events so you get to know all the different parts of the company, other interns, and just have an amazing time. I was definitely not expecting such an awesome internship.</p>

Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Definitely. Microsoft is a great place to intern at. You get to work on something meaningful and you have so many intern events going on every week where you become friends with interns working all over the company. This is a great way of exploring different parts of the field that you are interested on or maybe you didn't know about.</p>	<p>I don't think I would change much. I would do some things different based on the experience I have acquired, but that is part of the learning experience. And as far as the internship in general I don't think I would change anything.</p>	<p>Seattle is a great place to live at.</p>
