

## Willis Towers Watson

### Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>Retirement Actuarial Intern</p> <p>As an intern, I had exposure to the year-around work of the consulting actuaries. I generated accounting and funding valuations for clients, facilitated government form filings, and conducted benefit calculations.</p>	<p>I added my passion and hard-working ethic.</p>	<p>As I was walking into the internship, I was hoping to learn what a consulting actuary's day-to-day look like and also what technical skills are required. Now, I definitely have a better sense of what actuaries do each day.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes - Willis Towers Watson has a structured internship where there are at least three opportunities to learn the same material (so if I did not understand fully about a certain concept on the first time, there are at least two more times I can utilize to iron out my confusion).</p>	<p>The work for interns are sometimes up for grabs - so whoever has time at that time will get that work. I wish we had even exposure to all work so that we could have had experience in more variety of work.</p>	<p>This internship is not only to test your technical skills but also to test your soft skills.</p>
