## Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I interned at Kumo team, the team's responsibility is to provide support for support engineers	I wrote a troubleshooting tool for support engineers.	No, I do not really like my project. The design was changed several times because my manager left. An intern's project should be full-stack project instead of front end, like mine.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
The internship experience is generally good for many interns. But I don't think I enjoy the experience a lot, because I once in a tough position with my mentor.	I want to have another mentor, because my current mentor does not know or is involved in my project.	It is important to manage interpersonal relationship.
