

Facebook

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I interned for Facebook. I worked on the infrastructure team, and my project was basically to simulate the caching system, but doing everything in memory for more efficient testing.</p>	<p>I feel that at Facebook you get real work that needs to get shipped. My project was significantly important and was a necessity for the team.</p>	<p>The internship was awesome. Probably Facebook is one of the best companies in the world to work at!</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>I would definitely recommend the internship. It gives you a really a good sense about how would it be to work as a full time software engineer.</p>	<p>It's hard to think about things I didn't like. Maybe make the internship one week longer?</p>	<p>Facebook is a great company and they are not only Facebook. They also include Instagram, Whatsapp, Oculus, Internet.org, etc.</p>
