

Hewlett Packard Enterprise

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I work as the Bid Data Presale Tech Intern	I provided professional data analysis skills and machine learning methods for sales group.	Yes. I can apply what I learned in school to real company data.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes. It is in Austin, very convenient and also HPE is a good company.	I want to change my location to California because there are more technical people there.	The internship in Austin for HPE are most for the students with business and finance background but there are still several positions for the technical students.
