

Northshore University HealthSystem

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
My duties include analyzing next-generation sequencing data and writing papers with my collaborators and my supervisor.	My collaborators, my supervisor and I co-authored some papers during this internship.	Yes. I got the chance to work on several research projects and publish some papers, which is helpful for my PhD dissertation.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes. It's research orientated. Students are able to get some research experiences.	Work harder. Papers are not yet finished.	This internship usually requires that you or your advisor has connections here.
