

Zappos, Inc.

Summer 2016

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I was a software engineering intern and I working with the back-end API team the mobile team	The projects I worked on will both be in production at the end of the internship and they will each benefit the company and enhance the Zappos shopping experience	Yes. I didn't know what to expect because it's my first internship. But I have grown a lot as a software engineer and I feel better prepared for my career
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes. This is a great internship opportunity because the people at Zappos are great and they are of great help professionally. There is freedom in choosing projects and teams.	I wish there were another intern on my team. The learning at the beginning was a little challenging thus slow for an intern that's only going to work there for 10 weeks so it would've been easier and more fun if someone was on the same team with me.	The company culture is very different from a lot of corporations. Zappos cares a lot about relationship among people and sometimes it's hard to put your personal self into it. But other times it makes work a lot easier.
