Summer 2013

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
Statistical analysis of data.	Share knowledge and expertise about statistical techniques.	It was not according to my expectations- it was much more challenging than I had thought.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
I would recommend it to students who are expert programmers.	I wish that I had more experience with programming in a wide variety of languages, because it would have been extremely helpful.	Statistical analysis can be extremely programming intensive and involve other languages than the ones normally used in class.
