

Q2

Summer 2014

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
Data analysis. I work with Excel and make presentations.	I help to make projections and accurately predict the workload. I feel like my work is very important for strategical purposes.	I would say half-half. I expected that I would get a lot of data to play around with, but it turned out that no one except my boss knows statistics. We are kind of slow in the process since he is pretty busy.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
The working environment is great, and most colleagues are super nice.	Change my cubicle location. It is too dark. I prefer a location near the window.	If you are a programmer, maybe this is the best place you would like to work.
