

Dropbox

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>As a software engineering intern, I worked on mypy, which is an open-source typechecker for python.</p>	<p>I feel like I was able to contribute code that actually made a difference. It was fantastic knowing that someone's life is a little easier because of you.</p>	<p>I did not have particular expectation but I had a fantastic time. Everyone here is very happy to help interns out and the work all interns do actually matters.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes, absolutely! If you care about making a difference and making people's lives easier, Dropbox is the place to be! In addition, the company culture is very inclusive! :)</p> <p>The company is growing and it doesn't have a startup feel. But it is still smaller than the big tech companies.</p>	<p>I wish I chatted with more people over coffee. Coffee chats is a great way to learn about other people, what they do and how they think.</p>	<p>Dropbox is great!</p>
