Dun and Bradstreet

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
- Develop features for the credit & risk management platform D&B Credit as a full-stack engineer with AngularJS (front-end) and Java (back-end). - Configured deployment environment across multiple servers with Docker. - Visualized credit data using d3.js & d3.chart. - Collaborated with interns from other departments such as Business, Marketing, etc. and delivered the solution for a business case.	With my contribution on the virtual development environment configuration, I've helped engineers in the company reducing the working environment setup time from 2-3 days to under 1 hour. I have also developed a feature that allows users to gain more insights on the credit market for every countries in the world, by providing interactive visualization of the data. Lastly, I came up with a feasible idea that helps the company detect new businesses quickly and accurately. Right now, I'm working on another feature that helps engineers in the company manage resources on the cloud.	Overall, this internship exceeded my expectations in my many ways. The company has given the right people and the right resources to learn from and to work with efficiently. I have learned a lot since I came here, and the knowledge that I've gained here is not only applicable within the company, but also very helpful outside of work. The company also equips me with talks and workshops on different topics such as Internet of Things, Blockchain, Money, etc. that I've found to be very helpful for my future.
Would you recommend this internship to another student? Why or why not?	**If you could change one thing about your internship experience, what would it be and why?**	**Please provide any additional information regarding your internship that you feel students should know.**
I would totally recommend it because of the above reasons.	I would lengthen the duration of the internship because 10 weeks felt too short for an internship.	I found commuting to work to be quite challenging at first, since there is no bus route from school area (aka West Campus) to the office. However, emailing the recruiters and people in the company to ask for carpool option helped.
