## Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I was a software engineering intern, which meant working with my team on code up products that they needed. It was my responsibility to finish my assigned project and interact with the team during team meetings.</p>	<p>I think I helped finish some tasks that they had forgotten to get to. I also facilitated in team bonding and helped the team grow closer.</p>	<p>Yes, this met my expectations because I felt like I learned a lot.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>I would recommend this internship to another student because it is a good learning experience and they provide a lot of good benefits.</p>	<p>I would have not worked on Android development because it is rather slow and tedious.</p>	<p>N/A</p>
