

# IGT

## Fall 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I interned with IGT in the compliance department and worked on updating their internal reporting process through the implementation of tools such as Tableau.	The report system I worked on allows a deeper look into the data and allows quicker report generation that will benefit my department.	Yes, I feel the experience I gained in the tools I worked with, the people I worked with, and the frequent meetings helped build myself professionally.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes, it's a fairly casual workplace and the people are nice to work with. The management that oversees the internship program puts in a good bit of work to help the interns grow.	I was never given a proper tour of the office. It seems like a small thing but it took me like a month before I knew where everything was or what was fair game in the breakroom.	I feel that the internship program at IGT did a really good job teaching a lot of soft skills along with the department specific tasks and they offered many exercises and meetings that help students who haven't interned before.
