

Macromoltek

Spring 2018

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
Basically I was learning the language C#.	I feel like I added a lot of charisma to the company and also they had the experience of working with a novice who did not have any experience with computer science. They were able to do a trial and error with me because I was the guinea pig.	The internship did meet my expectations because they taught me a lot of valuable things that I never knew existed. Also, they gave me the opportunity to start from scratch and expand my potential.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes I would! It is a great way to learn the language C#!	I would like to not be as self-study as it was. I would be grateful if I had the opportunity to work with people longer!	This is a great beginning to learning computer science!
