

Microsoft

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I interned at Microsoft this summer as an Explorer intern, so I got to try out both the Software Developer role as well as the PM role during my internship.</p>	<p>I really felt that the project we worked on was something that our team really needed and wanted to ship in the next term. So I felt extremely fortunate to be working on such a product.</p>	<p>Yes, in more ways than I could have asked for. My mentors were great. They were very passionate about our project and about helping us. I really loved my intern project. And everyone I met was very kind and supportive.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes, if you're confused between a Dev role and a PM role, this internship will help you.</p>	<p>Start asking questions earlier and be bolder from the start.</p>	<p>Remember to have fun!</p>
