

Microsoft

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>I was a software intern and worked on a compiler that converted TypeScript to WebAssembly.</p>	<p>I was able to accomplish all of my goals for the internship and create awareness about WebAssembly inside the company, thus making it more interested in devoting substantial resources towards the same in the future.</p>	<p>Yes, the internship did meet my expectations. I worked with a great manager and learnt a lot over the course of the internship.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes, I would highly recommend Microsoft as an employer. They really care about and for their interns. It's also easy to meet new people in the company, simply by contacting them.</p>	<p>I would probably want to work on a project that dealt with machine learning and AI.</p>	<p>Explore the company and meet as many new people as you can.</p>
