

Quantlab Financial

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>Technology driven high frequency trading company. Made a replay system for order sending program that measures latencies, memory usage and other important stuff. Sent the data to Kibana. Also optimized some order sending code after discovering a latency bomb.</p>	<p>I optimized some order sending serializer that ended up decreasing latency by several hundred nanoseconds. Speed is everything in high frequency trading so company literally made more money.</p>	<p>Yes. There are tons of high quality software engineers in this company and everybody follows good code hygiene. Work is interesting and even if you are an intern you can make an impact.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes. There are tons of high quality software engineers in this company and everybody follows good code hygiene. Work is interesting and even if you are an intern you can make an impact.</p>	<p>I would have asked less questions to my teammates and push myself harder to learn stuff by myself.</p>	<p>Competitive pay and free good lunches.</p>
