

Dell

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I worked as a data science intern at Dell. My job is to analyze data and get insights out of it.	I applied the knowledge that I learn in class to the real-world data.	This internship meets my expectation and it was better than I would imagine.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes, I will recommend other students to intern at this company as people are there friendly and you can learn a lot from them.	I do not want to change anything about my internship because it was actually a very good experience to me.	As an intern, do not be afraid to ask questions. You need to understand your project so that you know how to implement it.
