

Reliant Immune Diagnostics

Spring 2018

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>Tested device and application developed by the company. My primary responsibility was data collection and verification.</p>	<p>My work was recognized as good data collection and thorough note taking. It was clear and organized.</p>	<p>Partially, the idea of developing a device that will improve healthcare delivery and reduce its costs was very exciting. However, the work that I got as an intern was very easy. It was more a technical job, rather than focused on research and development.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Depends on the career goals of the student.</p>	<p>I definitely would have liked to get more interesting and complex responsibilities.</p>	<p>Excellent work environment. Everyone in the company was very nice and intelligent. Definitely good networking experience.</p>
