

Uber

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
I was working on the storage team working on distributed systems.	I got a chance to work with a lot of distributed systems which I hadn't had at school.	This internship was beyond expectations. I got to work on some of the hardest problems in computer science which really interests me. My team was the best amongst the teams that I had previously interned on.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes! Uber is really changing the world with its ease of transportation. A lot of new and interesting problems are being solved here!	Live closer to the office. Had a 1.5 hour commute one way.	Work hard but have fun!
