

Uber Technologies, Inc.

Summer 2017

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
Software engineer intern, identity and access management team, web application development	Organized great team offsite for team to have fun and know each other more. Pushed new feature to code base that increased users' account safety.	Yes, even went beyond my expectation. I could feel like I am actually working here as full-time employee, and contributed a lot while learning.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes. I definitely grew up a lot through this experience, and have a better idea of what I would like to do after graduation.	I should have considered myself more like a "senior engineer" and express more ideas and thoughts.	There are many things I couldn't have known without actually experiencing it. I heard a lot about people's discussion about the company before I start, and it was not like what people imagined at all.
