

Zinnotech Inc.

Fall 2018

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
<p>My title was: Web Portal Systems Developer/Designer. Develop UI and Web Portal System</p>	<p>I believe that I was an integral part of development in building the foundation to the new project that they are currently on. I can't disclose any information.</p>	<p>Yes and no. It met my expectations in the sense that, it taught me a lot about the work force and how to cooperate with other colleagues. But it didn't quite meet my expectation in the sense that it was not a bigger company that I could grow more of my network from.</p>
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
<p>Yes and no. I will recommend it to people who want the experience it as someone who wants to start their own company as well and want to learn about the steps that include. I will not recommend it to people who want the whole big company experience with the whole happy hours and outings.</p>	<p>From what I what expected and wanted going into it, I wouldn't change a thing. My experience that I went into was learning about the steps of building the foundations and growth of a startup and implementation of a new idea and what all comes from getting a new idea to be produced to the world.</p>	<p>My additional information would be, if you want to learn how even a small idea can make a difference in the world, then join a startup. If not, don't be the intern of a startup.</p>
