

immuDX, LLC

Spring 2018

Please give a brief description of your duties.	What value do you feel you added to the organization during your internship?	Did this internship meet your expectations? Why or why not?
My project is about streamlining the immune repertoire analysis informatics pipeline.	My responsibility to my assigned work as well my hard work to learn new things.	Yes. My goal is to improve my programming skills during this internship in an industry setting and get a better understanding of how industry job works.
Would you recommend this internship to another student? Why or why not?	If you could change one thing about your internship experience, what would it be and why?	Please provide any additional information regarding your internship that you feel students should know.
Yes if you are working in the area of systems immunology. This job requires such background.	I cannot think of any. It's a very good internship experience.	My internship position is specifically designed for graduate students. They will have more internship positions coming designed for undergraduate students. For undergraduate student positions, lab experiences will be required.
